Philosophy

Philosophy is a critical, speculative, and reflective discipline concerned with the exploration of ideas. The questions with which it deals can be found in every human pursuit and subject matter. Among the subjects it embraces are the nature of truth and reality, the possibility of knowledge, the quest for moral values and political justice, and the nature of mind, language, art, and reason. The field of logic is a formal study of the art of exact thinking. Given this breadth, philosophy can be related to almost any subject or profession.

Recent studies have shown that strong liberal arts majors are in much demand in the world outside the University. While preprofessionals may enter the job market with higher salaries, those with liberal arts majors tend to rise higher in their professions. This is because a liberal arts degree indicates a capacity for thinking, learning, writing, and breadth of understanding. Philosophy is a strong liberal arts major, and majors in philosophy rank in the highest percentages for GRE, LSAT, and GMAT scores. In addition to academic work, philosophy contributes toward careers in law, medicine, business, government, journalism, religion, computers, and education.

The School of History and Philosophy at SIU Carbondale is a pluralistic school. It has faculty who specialize in the history of philosophy, logic, ethics, metaphysics, political and legal philosophy, feminism, critical race theory, American pragmatism, the philosophy of science, the philosophy of technology, and the philosophy of religion, among others.

The student electing to major in philosophy should consult the program’s director of undergraduate studies. Majors may request to take a graduate level seminar (for undergraduate credit) as a substitute for three credit hours at the 400-level. Philosophy majors will satisfy the College of Liberal Arts Writing-Across-the-Curriculum requirement by passing PHIL 305A or PHIL 305B. A minor is not required for a major in philosophy, though it is recommended that the student take foreign languages such as Greek, Latin, French or German.

Is reality essentially physical or does it include something nonphysical? What is "causality"? Is there an ultimate or highest reality, that which some call God? If God exists, can there be anything that is not God? Can we know what reality truly is or is the human mind fated to behold only the world as it appears to us? Can we at least know ourselves? Is human existence basically similar to the existence of any "thing" or does our sense of history and mortality make us experience Being in a different way? This course will engage these and other questions through readings selected from the Western tradition, from the ancient Greeks to the modern age. Readings from Asian traditions may also be included. Credit Hours: 3
