The School of Art and Design offers two undergraduate degrees, the Bachelor of Fine Arts (B.F.A.) and the Bachelor of Arts (B.A.). The B.F.A., a professional degree, includes five specializations: art education, communication design, industrial design, pre-art therapy, and studio art. Students enrolled in the B.F.A. studio art specialization may pursue an area of emphasis or multiple emphases in ceramics, drawing, glass, metalsmithing, painting, printmaking, or sculpture. The B.A. degree in art includes four specializations: art education, art history, general studio, and photography.

The education of teachers, scholars, artists, and designers requires a comprehensive program in the specializations and a university core program outside of the major. In meeting these objectives, the School emphasizes theory and practice in its specializations. Studies are sequentially planned to facilitate orderly matriculation through the baccalaureate curricula.

Within their first semesters of coursework, all majors are required to complete foundation studies: beginning coursework in art history, drawing, and two- and three-dimensional design. B.F.A. students must participate in a portfolio review of work from previous art studies (at SIUC or elsewhere) upon completion of the foundation studio courses and one or two courses specific to a specialization. This assessment portfolio review will evaluate the students' technical, conceptual and creative abilities, and provide feedback for further improvement.

Students in a design specialization must own a laptop computer and software as specified by Design faculty for subsequent courses. The hardware and software will be utilized throughout the Design course sequence beginning with the 300-level specialization courses. Financial aid may be available to eligible students. Students must consult the SIU Carbondale School of Art and Design website for current details on hardware and software requirements. Information is also available from faculty and the School’s advisement office.

Transfer students seeking admission from another program at Southern Illinois University must meet the same requirements as those seeking admission from another institution. Evaluation of a studio course for transfer credit from another institution will be made on the basis of a presentation of the work (or professional quality images of the work) executed in the course to determine whether the course will be considered equivalent to a specific course or accepted as studio elective credit.

Most prerequisite courses must be completed with a grade of C or better before a student may advance into the next course. Students should refer to individual course descriptions for specific information. All specialization-specific courses in the B.F.A. programs must be completed with a C or better.

Courses in art and design have limited enrollment, and enrollment may be canceled for students who do not attend the initial class session of the semester. Courses in some programs must be taken in a certain sequence, and not all classes are offered every semester. Admission to certain courses is restricted, and permission must be obtained prior to registration. For some courses, permission to register is based upon submission of a portfolio.

**Instructional Support Equipment Fee**

The School of Art and Design assesses all undergraduate art and design majors an instructional support equipment fee of $10 per credit hour; a maximum of 12 credit hours will be charged each for fall and spring semesters and six credit hours for summer.
Bachelor of Arts (B.A.) and Bachelor of Fine Arts (B.F.A.) in Art

**Art Education Specializations**

The specialization in art education is offered within a liberal art (B.A.) as well as a professional (B.F.A.) curriculum format. Upon completion of either program, students in art education are prepared and licensed to teach in the public schools. However, the Bachelor of Fine Arts degree program offers the student more studio electives in art and design. With the B.F.A. degree in art education, students are better prepared to teach studio arts in U.S. schools or go on for advanced study either in art or art education.

Traditional art historical concerns of style, technique, and aesthetics will play some role in our analysis; but our driving concern will be to approach these physical remains of the Greeks as a means of gaining insight into their own history and experience of the world: their changing political and communal identities, their gender roles and social practices, their conceptions of the gods, their views of life, their attitudes towards death, and their beliefs about what most mattered.
