Linguistics

Language is both a means of social communication and a unique property of the human mind. As such, linguistics - the scientific study of language - has a broad appeal to students who are interested in the social sciences, the humanities, computer science, or the life sciences. The undergraduate program in linguistics helps students understand the diversity of human modes of communication, the social and psychological origins of language, and the processes by which languages are learned and lost. A major in linguistics thus provides students with a focused but broad-based education in the liberal arts. In addition, the way linguists think about their subject has greatly influenced the development of other disciplines such as anthropology, computer science, language teaching, philosophy, psychology, and sociology. A degree in linguistics will thus be of great value to students intending to pursue careers in those fields.

Graduates of the linguistics program who enter the work force immediately after graduating find employment in a wide variety of settings as teachers, writers, translators, editors, civil servants, community developers, etc. Graduates who go on to advanced study find themselves well prepared for professional careers in fields such as linguistics, language teaching, educational administration, language planning, language research, speech pathology, lexicography, publishing, and foreign service.

Two tracks are available in the B.A. degree in Linguistics. The first track provides students with a solid grounding in linguistic theory and application; the second track focuses primarily on teaching English to new speakers of the language in an ESL or bilingual setting. Majors in both tracks are required to obtain a grade of C or better in each of the core courses.

Since the study of theoretical linguistics involves analysis of languages other than one’s native language, the linguistics track requires either one year of an uncommon or non-Western language or two years of any other foreign language. The ESL/Bilingual Education/ENL track requires one year of study of any foreign language, to allow time for additional coursework that ESL/ENL students may choose to take in order to obtain an endorsement to a Professional Educator License. Either course of study satisfies the foreign language requirement of the College of Liberal Arts.

The linguistics track of the major consists of a minimum of 33 semester hours. This includes 12 hours of required foundation courses and 21 hours chosen from linguistic electives covering a broad range of subfields within the discipline. This flexibility allows linguistics students to double-major in a variety of other fields.

Required courses: (12 semester hours)
LING 200 Language, Society, and the Mind
LING 300 Introduction to Descriptive Linguistics
LING 405 Introduction to Phonological Theories
LING 408 Introduction to Syntactic Theory

The 21 hours of electives may include (but are not limited to) courses on the following list. They must include 15 hours at the 400-level including a linguistics course designated Writing Across the Curriculum (WAC). Up to six hours may be drawn from other departments such as English, Psychology, Anthropology, and Languages, Cultures, and International Trade, subject to approval of the Linguistics faculty.
